

VIP Polymers Ltd. Established in 1923, VIP Polymers Ltd are one of the leading Global manufacturers of rubber sealing solutions for the pipe, tunnel and rail industries.

Compounding our own rubber coupled with our in-house laboratory allows us to manufacture seals of the highest quality and meet internationally recognised standards and approvals.

VIP-Weco – No Dig Pipe Repair System

Available in bespoke sizes from DN185 up to DN4000+, the VIP-WECO is a permanent trenchless pipe repair system suitable for all pipeline materials.

WRAS approved and complying with BS6920, the VIP-WECO is able to withstand internal pressures of up to 20 bar and external up to 2 bar. In addition to manned entry pipeline repairs, the VIP-WECO is often used for end liner repairs.

With typical installation times of around 30 minutes, the VIP-WECO is a cost effective permanent alternative solution to traditional entire pipeline replacement.

VIPSeal™ Flexible Couplings

A versatile range of flexible couplings and adaptors, used for joining and repairing low and non-pressurised pipes of any material and size combination. Designed for use in above and below ground applications, the VIPSeal™ range includes:

- Standard, large and extra wide couplings
- Drain couplings
- Adaptor couplings
- Wraparound couplings
- Puddle Flanges

Manufactured to BS EN 681, the highest quality raw materials are used to create the finest EPDM, SBR and NBR synthetic rubber which allows VIPSeal™ flexible couplings to be suitable for use with potable water, sewerage and drainage effluent. For applications where a higher chemical resistance is required, VIPSeal™ flexible couplings are also available, manufactured from FKM synthetic rubber.
