

RSM Lining Supplies  
CHOICE AND TECHNOLOGY

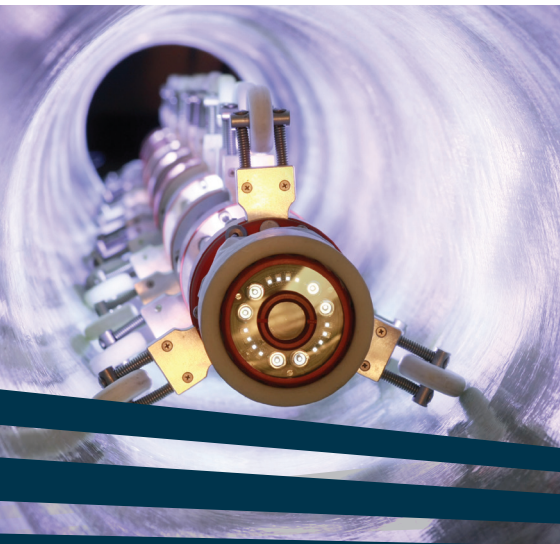

**SPEEDYLINER**

# SETTING NEW **STANDARDS** FOR **UV** PIPE REHABILITATION

# RAPID SPEED **UV** CIPP PIPE REHABILITATION

- > Suitable for all circular and oval profiles 150mm-300mm or other similar profiles
- > Fast installation times due to the UV-LED light curing
- > WRc approved system
- > High mechanical parameters due to fiberglass reinforcement which reduces cross-section loss after rehabilitation
- > Double quality control through camera inspection of the Speedy Liner before and after the curing
- > 6 months shelf life
- > Less space required in the installation as all necessary equipment can be stored in a single truck
- > Seamless construction and smooth surface, abrasion layer
- > Reduction of waste products due to the curing procedure
- > Reduced energy requirements during production, transport and installation
- > Complete opening of the laterals is possible immediately after the curing of the liner
